REST API JSON WEB SERVER

Visual representation of REST API JSON

JSON format for POST requests for the remote service of the chatbot

Examples of the chat conversation and corresponding JSON representations for each of the POST requests of the conversation.

Ex.1

```
{
  "text": "Hi there! What kind of movie are you in the mood for?",
  "user": null, // No user information required for this message
  "metadata": {
        "source": "Chatbot Response",
        "topic": "Movie Recommendation"
   }
}
```

Ex.2

```
{
  "text": "Hi! I'm looking for a good place to eat Georgian food.",
  "user": {    // Assuming user information is available (replace with your logic)
        "id": "user123",    // Replace with actual user ID
        "demographic": null    // No demographic data provided in this example
  },
  "metadata": {
        "source": "User Conversation",
        "topic": "Restaurant Recommendation"
  }
}
```
